Vladyslav Konokh

.NET Software Engineer
Wrocław, Poland • actuallydisrespectful@gmail.com • linkedin.com/in/vladyslav-konokh • t.me/DisrespectfulOne • github.com/M1re • m1re.github.io

Summary

.NET Software Engineer with 5 years of commercial experience as a backend C# developer, building systems and microservices with ASP.NET Core. Experienced with relational and NoSQL databases, cloud infrastructure on Azure and AWS, and CI/CD with Docker and Kubernetes. Comfortable owning a component end to end, working directly with stakeholders and helping teammates get up to speed.

Experience

.NET Software Engineer Jan 2026 - Present
DataArt **Remote**
Travel platform on .NET 10: search and data-indexing services on Apache Solr and MS SQL Server, hosted in Azure.

- Completed an in-house .NET indexing framework and moved index-build logic from 5 legacy projects into it.
- Migrated all search indexes from Apache Solr 6 to Solr 9.
- Made indexing 2.5x faster on average by optimizing API data loading and SQL queries.
- Contributed to index-rebuild jobs and per-index Datadog dashboards.
- Validated migrated indexes against production with automated AI-driven parity reports.
- Go-to engineer for the indexing platform, responsible for onboarding new team members.

.NET Software Engineer Nov 2024 - Jan 2026
DataArt **Remote**
Automated biorepository on .NET 8: robotic sample handling, camera-based label recognition and a lab CMS.

- Fixed memory leaks in ML.NET services, cutting infrastructure costs by ~$700/month per environment.
- Trained object-detection models to locate client-specific QR codes and sample labels on tube images.
- Automated model training from image sets labeled in VoTT.
- Built a ComfyUI workflow that generates synthetic training images, replacing manual photo shoots.
- Owned the migration of a project's container infrastructure from Docker Swarm to Kubernetes on AWS, including Helm-based deployment packaging.
- Built a monitoring service that brings Grafana and Kibana data into the lab CMS.
- Calibrated camera and robotic-arm parameters, including focus, sharpness and grayscale conversion, to improve label recognition accuracy.
- Developed Angular front-end features for the lab CMS.
- Wrote code in .NET, Python and C++ together with CMS, robotics and vision teams.

.NET Software Engineer Sep 2023 - Nov 2024
GlobalLogic **Remote**
Digital workplace platform on .NET 8 combining project management and social collaboration, built on Azure.

- Led the service migrating user data from platform v1 to v2, including planning, task distribution and stakeholder demos.
- Extended core microservices built with CQRS, MediatR, Azure Cosmos DB, Azure Service Bus and Azure Functions.
- Covered migration-critical services with xUnit unit tests to keep releases stable.
- Helped build the central monitoring service that sends logs and traces to Datadog.
- Drove technical decisions through evidence-based design reviews.
- Delivered infrastructure as code with Azure Bicep and CI/CD with GitHub Actions.

.NET Software Engineer Dec 2021 - Sep 2023
GlobalLogic **Remote**
Security platform on .NET 6 unifying RBAC and access-control tools for AWS and Azure behind one simplified configuration.

- Designed the platform's data model from scratch.
- Proposed and carried out the move from MS SQL to MongoDB to support a rapidly evolving schema.
- Built a monitoring and risk-management service that detects suspicious activity with configurable rules.
- Reduced a service's memory usage from ~5 GB to ~1.3 GB (~74%).
- Owned CI/CD pipelines and deployments for the team's microservices.
- Integrated Keycloak and Okta for authentication and authorization.
- Developed React front-end features for the platform.
- Mentored two interns, guiding them through code reviews and day-to-day tasks.

Education

Bachelor of Science in Computer Software Engineering Sep 2019 - Sep 2023
State University of Telecommunications Kyiv, Ukraine

Certifications

Claude Code 101 – Claude Academy (Anthropic) (verify) Nov 2026

Skills

Languages: C# • Python • SQL • T-SQL • PowerShell
Backend & Identity: .NET 10 • .NET 8 • .NET 6 • ASP.NET Core • ASP.NET Web API • Entity Framework Core • LINQ • async/await • REST APIs • Microservices • CQRS • MediatR • xUnit • Unit Testing • Keycloak • Okta • OAuth 2.0
Frontend: React • Angular
Data & Messaging: MS SQL Server • MongoDB • Azure Cosmos DB • Apache Solr • Azure Service Bus • RabbitMQ
Cloud & DevOps: Azure • Azure Functions • Azure Key Vault • Azure Bicep • AWS • Amazon EKS • Amazon ECR • GCP • Docker • Kubernetes • Helm • Docker Swarm • Git • GitHub Actions • Azure DevOps
Observability: Datadog • Grafana • Kibana
ML & Vision: ML.NET • ONNX • VoTT • ComfyUI

Languages

English: C1 • **Ukrainian:** C1 • **Russian:** C1 • **German:** A2 • **Polish:** A1
